

Are disconnected apps, repeat data entry and broken workflows slowing down your team?

You're not alone! Companies large & small invest in best-of-breed cloud apps but routinely get less than 30% utilization value from their software due to disconnects.

GLOO™ leverages advanced integration technology to offer a hassle-free fully managed solution that finally connects all your apps freeing up your team to conquer the world!

- Choose from 400+ cloud-apps to connect.
- Our engineers work with you to map out each integration scenario in detail.
- We configure, deliver and host your integrations – **completely hassle-free!**

- GLOO is powered by a flexible and scalable integration platform backed with the most up-to-date connectors for hundreds of apps.
- GLOO ensures data flows smoothly and logically between your apps.
- GLOO unburdens your team so you can focus on running your business.
- Your service includes hosting, continuous API updates & our fanatical customer support.

ONBOARDING PROCESS

1

Choose the apps that you want to connect and pick the corresponding GLOO Plan.

2

Our System Engineers (SEs) work with you to map out each integration scenario in detail.

3

We configure and take you integrations live including continuous monitoring and support.

PLANS & PRICING

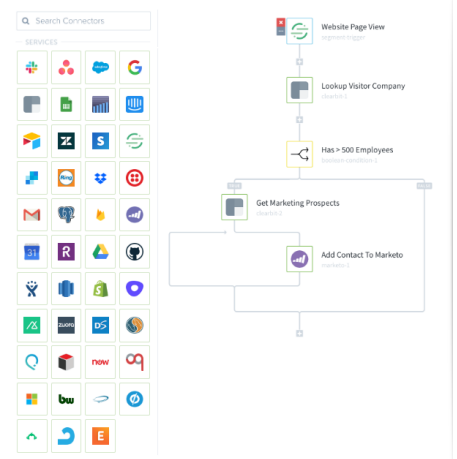

Plan Tier	# of apps to be connected ¹	Hosting Fee ² (per month)	Initial Setup ³ & Onboarding	Ongoing ⁴ Customization
GL2	2	\$99	\$225	2 hrs /year incl.
GL3	3	\$159	\$295	3 hrs /year incl.
GL4	4	\$249	\$395	5 hrs /year incl.
GLx	5+	Contact	Contact	Contact

1. This is the number of cloud based apps that you wish to connect. For example one or more of your integration scenarios may involve connecting data and workflow across Salesforce, QuickBooks and Dropbox. This would require 3 connections hence the GL3 plan.

2. Price when paid annually. Add 10% for monthly payment plans.

3. This one-time fee covers the initial analysis and setup of your integration scenarios across your selected apps. It covers up to 2, 3, or 5 hours of initial setup for tiers GL2, GL3, GL4 respectively. This is sufficient in most cases however for more complex scenarios more setup hours are available. A fixed price estimate can be provided at the project outset.

4. As your business grows and your needs change our system engineers work with you to ensure your integrations grow and adjust accordingly. Included in your GLOO subscription is ongoing customization and configuration hours.
